

MX340

The Case You Need

Space for a high-end build, convenient installation and an elegant design with a big tempered glass meet in this wonderful case.

Ready for the Newest Games

MX 340 is more than looks; it can house a full-fledged high-end gaming computer with a graphics card up to 330 mm and support for six fans and a 360mm water cooling radiator you'll get all the horsepower you need to run the latest games and the cooling your components require.

A Window to Glory

A brushed frontal texture complements MX340's black body to create a design that makes it a worthy heir of the COUGAR line of MX cases. The tempered glass cover on its left side allows you to see your computer's components and gives you an excellent opportunity to install RGB strips and other lighting devices that will make your case overflow with light.

Extra-Wide

MX340's 205mm width ensures there will be plenty of room in the case. This extra space makes installation of components more comfortable and improves the internal airflow. Additionally, the two air filters (top and bottom) can be easily removed to clean them and prevent dust accumulation.

MX340

The Case You Need

Excellent Cooling

With the possibility of installing up to two water cooling radiators and six fans, MX340 allows you to protect your computer's most important components from overheating.
