

PANZER EVO

The Crystalline Titan

Powerful and astonishingly beautiful. There's no other way to describe Panzer EVO, a case that combines virtually unlimited potential for upgrades with a high-end futurist design. It doesn't really matter what you want to do with your computer; it will almost surely be doable within a Panzer EVO.

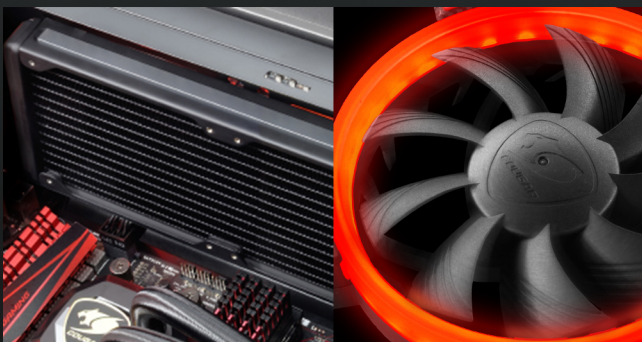

A True Beauty

Four tempered glass pieces cover the immense space this case gives you to build and develop the PC of your dreams while allowing you to see all the high-end components you install inside of it. To add a strong lighting effect, four LED 120mm fans (three in the front, one in the rear side) further enhance the majesty of this art piece.

Superior Cooling

PANZER EVO allows you to create impressive cooling solutions: Up to eight fans and four water cooling radiators to dissipate heat and an intelligent cable management system behind the motherboard tray to help the air flow and keep everything tidy.

Future-Proof

Support for six different motherboard form factors, up to four double slot 390mm graphics cards and loads of space for storage and media drives give you the freedom you want to design your build and to expand it. 4K, Virtual Reality, ridiculously high frame rates and more; everything is possible with PANZER EVO.
