INCREDIBLE RGB LIGHTING

PURITAS RGB comes with 3 COUGAR Vortex RGB FCB 120 fans and a COUGAR Core Box C that supports up to 8 fans and 4 LED strips! Control the 14 lighting effects we've preset for you with the case's dedicated RGB button, or connect it to a compatible motherboard's 5V RGB connection for system-wide synchronization!

POWERFUL COOLING

To run the latest games, you need potent components that generate lots of heat; Puritas RGB allows you to enjoy gaming without worrying about overheating thanks to its fantastic cooling support. With the possibility of installing up to five water cooling radiators and ten fans, you will have greater leeway in designing the right solution to keep your computer well cooled!
